Topographical – Measured Building – Legal Plans
Measuring up in The East Midlands since 1994

North Point Surveys was established in May 1994 to provide a complete land surveying service covering the whole of the U.K.

North Point Surveys is a member company of
The Royal Institution of Chartered Surveyors.

The company's business is the provision of accurate, true to scale plans and maps of sites and buildings which are ready for development, redevelopment or extension. Our survey drawings are available in graphical and digital format at any scale. Our clients include architects, landscape architects, consulting engineers, law firms, local government, commercial and charitable organisations, and the general public.

The company has clearly defined procedures when undertaking work. All aspects of the site work and subsequent drawing is controlled by rigorous checks. All instrumentation used are calibrated on a regular basis to traceable standards.
